### Colour overprint with white underprint on the whole surface

As a result of covering the whole back of the glass with white paint, graphic is clearly visible from the front. There is no transparency effect.

### Colour overprint with white colour as a background under the colour pixels

Getting a more visible overprint by using the white colour as a background. The rest of the glass trophy is transparent.

### Laser engraving

Laser engraving of the glass surface is the easiest way to personalize the trophy. This method is the most durable as well as resistant to external conditions, decoration technique.

### Colour overprint without white underprint

The graphic design is printed without using white paint. Thanks to this technique, the print is visible and gives the transparency effect.

### 3D engraving service – 2D model

Transferring flat Artwork inside glass for example: picture, drawing, text, logo, graphic

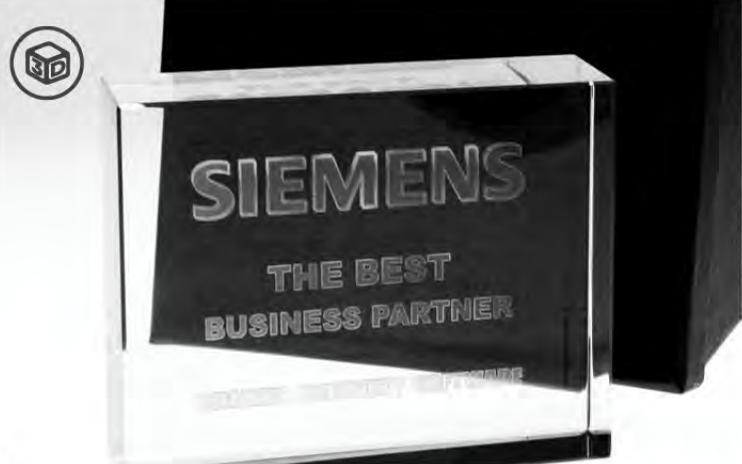

### 3D engraving service – 3D model

Pattern 360° 3D pattern with all details, for example: car, architecture, flowers etc

### Laser engraving with paint filling

Paint filling in a selected colour of all or selected parts of the design, previously engraved with a laser. Eco-friendly, long-lasting paints are perfect for filling engraved graphics, e.g. logos. The applied effect will distinguish the trophy and give an individual and unique character.

### 3D engraving service – 2,5D model

Pattern 180° from normal picture conversion from normal picture to three-dimensional for example: picture of face, animal, logo
